Dental Health

Incorrect brushing technique is one of the top six causes of tooth decay. Did you know that it takes two to three minutes to properly brush your teeth but most people only spend 30 seconds or less?

Teach your child to brush:

- Brush twice a day - after breakfast and before bedtime. If they can, brush after lunch or after sweet snacks.
- Use a pea-sized blob of toothpaste (you don't need much).
- Use a fluoride toothpaste - either a normal one or a low fluoride one for younger kids under six years of age.
- Get your child to gently brush the inner surface of their teeth back and forth using short circular motions. Then move to the outer surface and then the chewing surface on top. Make sure they pay particular attention to where the tooth meets the gum as this is where plaque builds up.
- Use the tip of the brush to clean behind each front tooth – both top and bottom.
- Remind your child not to be too rough. It takes very little pressure to remove bacteria and food and too much pressure can harm the gums.
- Encourage your child to spit out toothpaste after brushing but don't rinse.
- Spend two to three minutes brushing. If it's difficult to keep track of time use an egg timer or play a favourite song.
- Use toothpaste under adult supervision and keep out of reach of children to avoid children eating the toothpaste.

TUMUT HIGH VISITS

As part of the Year 7 transition program, Franklin is hosting classroom visits for Head Teachers from Tumut High. Last week Mrs Marley and Mrs Stroud spent time in our classrooms and this week we welcome Ms Nichols and Mr Muell. The visits allow high school teachers to see how primary teachers engage students in the classroom and in turn see our Year 6 students in action.
