FOR THE LOVE OF SCIENCE

Science is a method of engaging with, and trying to understand, the world. Professor Tim Flannery says if a child is interested in pursuing science, encourage them to develop persistence and humility – the idea that they won't always be right.

Nutrition Snippet

The simplest way

to set a healthy example for our kids.

Did you know that in NSW 9 out of 10 parents are not eating the recommended daily amount of veg and half are not eating the recommended daily amount of fruit?

What you eat influences what your children eat; this is especially important with fruit and veg because eating adequate amounts all your life can help protect you and your children against all of these:

- Coronary heart disease
- Some forms of cancer
- Obesity and being overweight
- Constipation
- High blood pressure and cholesterol levels
- Diabetes

By eating more fruit and veg now you'll be a healthy role model for your kids and help protect their health in the future.

STUDENT SAFETY – PARENTS PLEASE HELP

To remind parents of procedures to maximise the safety and welfare of all students. Parents should:

- Get out of the car and come into the school grounds to collect their child/ren.
- Use the cement pathways to enter school grounds from Capper and Forest Street.
- Supervise students, including toddlers as you return to your car. Children who run ahead are at risk.
- If you wish to have a chat, ensure your children are under your direct supervision.

Please don't

Park in either of the staff car parking areas.

Walk through the car parks to get to your car, always use the cement walkways.
